5. Mohamed Mahmoud Abdelshakor Ahmed

## PHP Web Developer Track

Supervisor :Eng.Mohamed Elhabashy

## Date of Presentation:

25-11-2024

# OVERVIEW

This project is a web application designed for **travel ticket reservations** and **trip bookings**. It provides users with an easy-to-navigate platform to explore popular travel destinations and book trips online. The website offers a seamless experience, from user registration to booking confirmation, ensuring a smooth and user-friendly process.

The application is built using the **Laravel** framework with **PHP** as the primary backend language, taking advantage of Laravel's powerful features for routing, authentication, and database management.

# PROBLEM STATEMENT

Existing trip booking platforms can be complicated or overloaded with unnecessary features, making it difficult for users to book trips and for admins to manage bookings. Additionally, users often don't have direct contact with admins, which can lead to delays in communication. This project seeks to address these challenges by providing a straightforward, user-friendly platform where the admin can efficiently manage trips and user inquiries.

# OBJECTIVES

**Provide users with a simple and seamless travel booking experience.**

**Allow users to choose popular travel destinations and book trips online.**

**Create a dedicated admin dashboard to manage reservations, guides, and contact inquiries.**

**Implement user authentication and profile management.**

# EXISTING PRODUCTS

**Expedia**

Comprehensive travel bookings  
(flights, hotels, car rentals,  
vacation packages).

**Booking.com**

Extensive hotel listings, user  
reviews, and flexible cancellation  
policies.

**Airbnb**

Unique accommodation listings  
(apartments, homes), experiences,  
and guided tours.

# TECHNOLOGIES REVIEWED

- ***Backend***

Laravel (PHP framework), MySQL (database)

- ***Frontend***

HTML, CSS, JavaScript , Bootstrap

- ***Tools***

VS Code , Github

# FUNCTIONAL AND NON-FUNCTIONAL REQUIREMENTS

Functional Requirements:

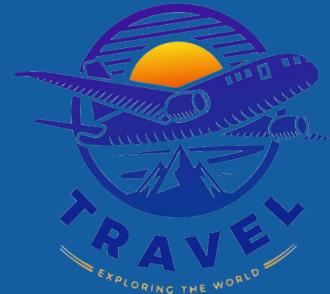

- 01 Users can browse and search for travel destinations.
- 02 Booking system for trips, including date selection and booking confirmation.
- 03 Admin can add, edit, or delete destinations.
- 04 User authentication: Login, register

# FUNCTIONAL AND NON-FUNCTIONAL REQUIREMENTS

Non-functional Requirements:

- 01** Quick response times for searching and booking.
- 02** Intuitive user interface and easy navigation.
- 03** Ability to handle a large number of users and bookings simultaneously.
- 04** Ensure data privacy, especially for user information and payment details.

# PROJECT SCOPE

## In-Scope

- Developing a travel booking platform where users can search, book, and manage their trips.
- Admin panel for managing destinations and bookings.
- Integration with a database for storing user and booking information.

## Out-of-Scope

- Third-party API integration for flight booking or external travel services.
- Offline travel planning and booking.

# TARGET AUDIENCE

## Target Users:

- Travelers looking for an easy-to-use platform to book and manage trips.
- Travel agencies or tour companies that need a system to manage their trip offerings.

## Beneficiaries:

- Users benefit from a streamlined process to plan and book trips.
- Travel businesses benefit from improved customer management and trip organization.

# Milestones and Timeline

**Frontend Development:**  
Developing the user interface for the website (HTML, CSS, Blade templating).

**Core Features Implementation:**  
Implementing travel search, booking system, and admin panel.

**Project Planning and Requirements Gathering:**  
Finalizing the project's scope, functional, and non-functional requirements

**Backend Setup with Laravel:**  
Setting up Laravel environment, database design, and user authentication.

**Testing and Debugging:**  
Conducting functional testing, user acceptance testing, and fixing bugs.

# VALIDATION & SECURITY

- User authentication with login and registration.
- Admin login is protected with validation checks.
- All forms include validation to ensure data integrity and security.
- CSRF Protection
- Middleware for User Authentication

# Final Outcome

## Live Travel Booking System

A fully functional travel platform where users can:

- Browse and search for destinations.
- Book trips and view booking history.
- Admins can manage the destination listings and view bookings.

## User-Friendly Interface

Designed with a clear, intuitive UI to ensure smooth navigation for both travelers and administrators. It can be printed or published electronically.

## Secure and Efficient

Implemented user authentication, database encryption for sensitive data, and optimized performance for faster response times.

# Key Achievements

- Leveraged Laravel's powerful features like Eloquent ORM, routing, and Blade templates.
- Completed the full booking system, with real-time search and secure booking functionality.
- The system can handle multiple users and destinations with future expansion in mind.
- Created a custom panel for managing destinations, users, and bookings with minimal effort.

# Future Enhancements

01

## Improved Destination Filtering:

- Add more filters for users to search destinations based on criteria like price range, ratings, travel duration, and travel packages.

02

## Advanced Booking System:

- Enable users to book not just trips but additional services like accommodation, transportation, and guided tours within the same platform.

03

## User Recommendations:

- Integrate machine learning to offer personalized travel recommendations based on user preferences, booking history, and popular destinations.

04

## Multilingual Support:

- Expand the platform's usability by adding language options for international travelers.

Key Resources	Channels	Cost Structure	Revenue Streams
<ul style="list-style-type: none"> <li>- Website and dashboard</li> <li>- Database management</li> <li>- Admin user interface</li> <li>- Subscribers data</li> <li>- Technology stack: frontend, backend, and hosting</li> <li>- Developer team</li> </ul>	<ul style="list-style-type: none"> <li>- Website (online platform)</li> <li>- Social media (for promotion)</li> <li>- Email marketing for updates and promotions (via subscribers)</li> </ul>	<ul style="list-style-type: none"> <li>- Website development and maintenance costs</li> <li>- Hosting fees</li> <li>- Marketing and advertising (future)</li> <li>- Customer support and administration costs</li> </ul>	<ul style="list-style-type: none"> <li>- Trip booking fees (future)</li> <li>- Premium listings for travel agencies (future)</li> <li>- Advertising from guides, agencies, or related businesses (future)</li> </ul>

# BMC

Key Partners	Key Activities	Value Propositions	Customer Relationships	Customer Segments
- Travel agencies	- Website development	- Easy trip booking for users	- Responsive customer support	- Travelers
- Tourism boards	- Trip management	- Admins can manage trips efficiently	- Regular updates	- Tourists
- Local tour guides	- Trip management system	- No payment integration needed initially	- Feedback handling	- Adventure enthusiasts
- Web hosting service	- Admin dashboard maintenance	- Personalized user experience through trip search and booking features	- Personalization through subscribed content (newsletter)	- Admins (business owners) managing trips and users
- Marketing agencies (future)	- Customer support - Content management (guides, FAQs)	- Direct communication between users and admin		

# USE-Case Diagram

# Add Destination Sequence

# Reserve A Trip Sequence

# PAGE BREAKDOWN

**Home:** Displays popular destinations and the About section.

**About:** Provides information about the platform.

**Destination:** Lists available travel destinations.

**Contact:** Users can reach out through the Get in Touch form.

**Admin Dashboard:** Access for managing reservations, guides, and user messages.

# User Flow

- **Login/Register:** User creates an account or logs in.
- **Home :** User views popular destinations and information.
- **Booking:** User selects a destination and books a trip.

## Navbar

The top navigation bar provides links to Home ,About, Destinations , Contact, Login. and number of subscribers.

# Reservations

The screenshot shows a travel website interface. At the top, there is a navigation bar with links for Home, About, Destinations, and Contact. On the right side, a user profile is displayed with the name "mohamed" and a subscriber count of "Subscribers: 2". A dropdown menu from the profile icon includes "My Reservation" and "Logout". The main content area features a banner with the text "My Reservations" and a breadcrumb trail "Home ➔ My Reservations". Below the banner is a table listing a single reservation:

#	Destination	Date	Action
1	london	2024-10-14	<a href="#">Delete</a>

At the bottom of the page, there is a footer section with four columns: Company (links to Home, About Us, Services, Blog, Contact Us), Useful Links (Destinations, Our Branches, Latest Media, About Company, Our Packages), Our Services (Privacy Policy, Our Terms, Services, Landing Page, Our Guides), and Newsletter (Get latest updates and offers, Email Address input field, Go button, Sign up for our latest news & articles. We won't give you spam mails.).

# Dashboard

## 5-User Reservation

The screenshot shows a web browser window titled "Travel Dashboard Admin" at the URL "127.0.0.1:8000/admin/userreservations". The browser's address bar also displays "Travel Dashboard Admin" and the port "127.0.0.1:8000". The page header includes the "TRAVEL MATE" logo and the text "Admin User". On the left, a sidebar menu lists "Dashboard", "Destinations", "Guides", "Contacts", "About Sec", and "Users Reservations", with "Users Reservations" currently selected. The main content area is titled "User Reservations (Total Reservations: 1)" and contains a table with one row of data:

#	USER NAME	DESTINATION	DATE
1	Amora	Raya Leblanc	2018-02-01

The system interface is in Arabic, as evidenced by the labels "Admin User", "User Reservations", and "DESTINATION". The date format is "YYYY-MM-DD". The system also includes a search bar at the bottom left and various system status icons at the bottom right.
